Subject: ELG and wastewater exemption at Climax mine - alert

I am notifying you that Climax mine may contact OW management about our evaluation of their arguments that the wetlands adjacent to their ditches carrying contaminated water are exempt from 404 because they are part of the waste treatment system. The letter is attached. We expect the JD today so that should render the call to EPA moot. Climax may call anyway so you may wish to notify your management. Until I see the JD, I cannot predict what the Corps' JD will indicate. I will keep you informed regarding the JD findings.
